## Objectives

---

A Full-Stack web developer seeking a position where I can contribute to achieving company goals, and further enhance my professional growth.

## Projects

---

### 1- Mini-Facebook website

A website that resembles Facebook in many features like add friends, follow/unfollow, add new post, and react to these posts and other features.

Tech and roles: **react.js** and **tailwindcss** for building a modern UI, **express.js** and **node.js** for building Backend and rest API.

And other libraries like: **clerk** for Authentication and Authorization, **lucide-react** for icons, **axios** for fetching data, **redux** and **redux toolkit** for management statements, **mongo** and **mongoose** for database management, **imagekit** and **multer** for media handling and **ingest** for create notifications workflow

## Education

---

Al-Azhar university 2016-2021

Bachelor of Science in Pharmacy.

## Skills

---

### TECHNICAL SKILLS

**Front-End:**

**Core Web:** JavaScript, HTML, CSS

**Frameworks:** React.js, Angular.js and Next.js

**Styling and UI:** Tailwind CSS, Bootstrap

**State Management:** Redux, Redux Toolkit and redux-persist

**Back-End:**

**Farmeworks/ libraries:** Express.js, Node.js

**Database management:** mongo DB, Mongoose

**Security:** JWT, CORS, Bcrypt.js and Clerck

**Editor:** VS Code

**Version control:** GitHub

**Typed Language:** TypeScript

**CI and Deployment:** Vercel and Render

### PERSONAL SKILLS

**1-Problem Solving**

**2-Fast Learning**

**3-Self Motivated**
